

# Free Floating Lever Dual Gravity Drain Traps

For Pressures to 69 bar

Armstrong free floating lever dual gravity drain traps are identical to the units described on pages LD-393 and LD-469 except float weights are modified to make them suitable for draining water from a light liquid. If you wish to use them for draining any liquid with specific gravity other than 1,00, consult the Armstrong Application Engineering Department.

Floats for dual gravity drain traps are weighted with quenching oil which, in the unlikely possibility of float failure, may be dispersed through the system. If this is a hazard, consult the Armstrong Application Engineering Department.

**Note:** Armstrong can design dual gravity traps for venting light liquids from above heavier liquids. Consult the Armstrong Application Engineering Department.

### Viscosity Considerations for Dual Gravity Traps

The operation of dual gravity traps depends upon a float that will sink in the light liquid and float in the heavy liquid. When the specific gravities of the two liquids are very close, the available operating forces are, therefore, also very small. Viscous fluids may impair the ability of the trap to respond to changing liquid levels.

Consult Armstrong's Application Engineering Department if your application involves fluids more viscous than 70 cs, which is approximately the viscosity of a light machine oil.

**Table LD-402-2. Maximum Operating Pressures in bar for Draining Water From Different Specific Gravity Liquids With Orifices Available in Dual Gravity Drain Traps (See pages LD-380 and LD-381)**

Model No.	Sp. Grav.	0,50	0,55	0,60	0,65	0,70	0,75	0,80	0,85

	3/8"	14,0	12,0	11,0	9,5	8,0	6,5	4,8	3,2	1,8
	11/32"	18,0	16,0	14,0	12,0	10,0	8,5	6,5	4,4	2,4
	5/16"	24,0	22,0	19,0	16,0	13,0	11,0	8,0	5,5	3,0
	9/32"	32,0	28,0	24,0	20,0	18,0	14,0	11,0	7,5	4,0
	1/4"	46,0	40,0	36,0	30,0	26,0	20,0	16,0	11,0	6,0
7/32"	65,0	55,0	50,0	44,0	36,0	30,0	22,0	15,0	8,5	
3/16"	69,0	69,0	69,0	69,0	60,0	48,0	36,0	24,0	14,0	

**Note:** If actual specific gravity falls between those shown in the above table, use the next higher gravity. For example, if actual gravity is 0,73, use 0,75 gravity data.  
\* For vessel pressures above 17 bar, always use steel drain traps.

# Free Floating Lever Dual Gravity Drain Traps

For Pressures to 69 bar

Table LD-403-1. DG Series List of Materials					
Model No.	Valve & Seat	Leverage System	Float	Body & Cap	Gasket
2-DG 3-DG 6-DG	Stainless Steel			Cast Iron ASTM A48 Class 30	Compressed Asbestos-free
32-DG 33-DG 36-DG				Forged Steel ASTM A105	

For information on special materials, consult the Armstrong Application Engineering Department.

\* Available in Type 316 stainless steel. Consult factory.

\*\* Other flange sizes, ratings and face-to-face dimensions are available on request.

Shade indicates products that are CE Marked according to the PED (97/23/EC). All the other models comply with the Article 3.3 of the same directive.

† May be derated depending on flange rating and type.

**All dimensions and weights are approximate. Use certified print for exact dimensions. Design and materials are subject to change without notice.**
